What is Stonehenge Oil?

Michael Ginsburg, creator of Stonehenge Oil, explains what Stonehenge Oil is, why he created it and what makes it different than other papers created for oil.

 Watch here on YouTube.

What is the difference between Stonehenge Oil and a Canvas?

- A Canvas is slick and more difficult to get a pure opaque color onto at the first application. This means painting alla prima (in 1 session) is more challenging.
- Stonehenge Oil absorbs the oil paint more readily so you can lay down paint and get better color values.
- Canvas has a hard, commercial feel. Stonehenge Oil has a soft, tactile surface.
